

HeatKing Controls Specification: Immersion Heater Control using Immersion Heater Programmer

System Description

Using an immersion heater to raise the domestic water temperature to above 60°C on a heating only system or heating priority system.

Controls :

Suppliers Part No	Description	Qty
xxxxxxx	Immersion heater programmer wired directly to control the switching on and off of the immersion heater	1

IMPORTANT:

When using a ASHP it is advisable to look for the least expensive electricity rate available. Economy 7 may not be a suitable rate as the unit runs to provide heating when required by the Immersion Heater.

IMPORTANT:

If alternative manufacturers components are to be used they must be to the same specification
